FREE

- No fee for students to participate
- Transportation costs are fully reimbursed through support from
THE Scotts Miracle-Gro
COMPANY
- Open to first-grade classes in Irvine, Santa Ana and Tustin

Reporting Live from the Great Park is a STEAM (Science, Technology, Engineering, Arts and Math)-focused program for first graders using “disguised learning” to build knowledge of scientific investigation, physical science, geography, earth science, technology, language and visual arts.

Children ride the Great Park Balloon and tour the Farm + Food Lab, conducting fieldwork and experiments, then articulate what they learn by recording a news report at the OCGP-TV Studio. Garden instruction is conducted by the University of California Cooperative Extension Master Gardeners.

Last year, more than 400 first graders participated in this program and in 2012 the program is being expanded to host 2,000 students from the Irvine, Santa Ana and Tustin unified school districts. **Space is limited and will fill quickly – register today.**

Registration closes January 20, 2012.

To register, please contact:
Gina Staropoli, Orange County Great Park
949-724-6593 or gstaropoli@ocgp.org
